F1 · Probe accuracy and transfer by layer · Qwen2.5-3B-Instruct
(a) Reading the instruction contrast (D1)
accuracy
layer (residual index)
D1 held-out, mean-diff direction
D1 held-out, logistic probe
Control task (random labels per type), probe
Which paraphrase? (10-way, chance 0.1)
(b) Transfer of the D1 direction
AUROC (threshold-free)
layer (residual index)
95% band: random directions
D1 direction → D2 (emotional content)
D1 direction → D3 instruction contrast, new formats (mean of 3)
D1 direction → D3 content contrast, new formats (mean of 3)
Reference: D2 direction → D2
steering layer 24
